

PROJECT DESIGN PHASE-I

PROPOSED SOLUTION

Date	21 October 2022
Team ID	PNT2022TMID17642
Project Name	Industry - Specific Intelligent Fire Management System
Maximum Marks	2 Marks

PROPOSED SOLUTION TEMPLATE:

Project team shall fill the following information in proposed solution template.

S No	Parameter	Description
1.	Problem Statement (Problem to be solved)	To improve the safety management system in industries. Improving the safety management system against the fire incidents in industries.
2.	Idea / Solution description	To implement the fire safety management in industry based on IOT using Arduino uno board with fire detection and fire extinguisher system. And using some sensors (Humidity sensor, Flame sensor, smoke sensor) with GPS tracking system.
3.	Novelty / Uniqueness	An integrated system of temperature monitoring, gas monitoring, fire detection automatically fire extinguisher with accuracy of information about locations and response through SMS notification and call.
4.	Social Impact / Customer Satisfaction	It early prevents the accident cost by fire in industries. Nearby locations so maximum extend more accurate reliability.

		Compatibility design integrated system
5.	Business Model (Revenue Model)	<p>This product can be utilized by an industry.</p> <p>This can be thought of as a productive and helpful item as industries great many current rescuing people and machine from the fire accident.</p>
6.	Scalability of the Solution	<p>It is trying to execute this technique as we need to introduce an Arduino gadget which was modified with an Arduino that takes received signals from sensors. Easily operatable and can be maintained.</p> <p>Required low time for maintain.</p> <p>Cost is reasonable value.</p>
